Full-Stack Software Engineer with 6+ years of experience specializing in the design and development of web applications. Experienced in TypeScript, NestJS, Vue.js, Laravel, and PostgreSQL, covering the entire development lifecycle from technical design and architecture to deployment.

PROFESSIONAL EXPERIENCE

Web Development Engineer SILICO Lyon, France

Since Sept. 2024

- Designed, architected, and developed a medical bill payment application integrating Société Générale's Sogecommerce payment solution, supporting both individual and group payments for patients.
- Designed and developed a cross-platform medical desktop application using Electron, featuring an offline-first architecture, local storage with IndexedDB, bidirectional data synchronization, and an automatic update system.
- Redesigned a paid leave management application for CICPR, migrating from a legacy system to Vue 3, TypeScript, and NestJS, including complex algorithms for calculating employee entitlements based on irregular working hours and contributions.
- Developed a full-stack application to automate business data entry into web forms and Excel spreadsheets, incorporating AI-assisted field mapping, browser automation with Puppeteer, scheduled processing, and SAP integration.
- Led the migration of a Document Management System (DMS) from Symfony/Vue 2 to NestJS/Vue 3/TypeScript, including a UI redesign and improvements to code maintainability.
- Developed and maintained a web application for managing patient interventions, including form creation and completion, report generation, and automated delivery of medical reports to physicians.

Full-Stack Web Developer (Work-Study Program) SILICO Lyon

From Jun. 2023 to Sept. 2024

- Developed RESTful APIs for managing large volumes of documents.
- Implemented a custom SAP content server to improve the reliability of document exchange and retrieval.
- Contributed to the migration of a web application from PHP/Symfony to Node.js, improving backend performance and maintainability.

Web Developer (Work-Study Program) HSK Digital Crécy-sur-Serre, France

From Jan. 2022 to May 2023

- Integrated a service sales configurator for TGS France, implementing complex user journeys and business logic.
- Enhanced the SmartDataForLead SaaS platform using Laravel and Vue.js, including bug fixes, performance optimizations, and new feature development.
- Developed Predesire, an internal tool for managing customizable products and their associated workflows.

Web Developer Brain Solutions Beirut, BA, Lebanon

From Jan. 2020 to July 2021

- Developed and maintained e-commerce platforms, including product catalogs, order management, and secure payment processing.
- Built a financial dashboard to monitor revenue, expenses, and operational performance indicators in real time.
- Automated invoicing processes and digital document archiving, while providing technical support to clients through deployment.

EDUCATION

Master's Degree in Project Management – Web & Mobile Development Éstiam Lyon, France

From Sept. 2022 to Sept. 2024

Master's Degree in Software Architecture La Rochelle University La Rochelle, France

From Sept. 2021 to Aug. 2022

Bachelor's Degree in Computer Communications Networks Engineering Lebanese University Beirut, BA, Lebanon

From Sept. 2018 to Aug. 2021

TECHNICAL SKILLS

Backend Development
NestJS, Node.js, TypeScript, Laravel, REST APIs

Frontend Development
Vue.js, React, JavaScript, HTML, CSS

Databases & ORMs
PostgreSQL, SQL, MySQL, MongoDB, TypeORM, Prisma

DevOps & Development Tools
Docker, Git, GitLab, GitHub, CI/CD
